

ionic sea mineral drops

More Power To You

Your body is an intricate circuit board of electric charges and impulses. In order for it to stay balanced and to perform at optimum efficiency, you need to constantly replenish yourself with the minerals and trace elements found in Ionic Sea Mineral Drops. If you are one of the 90% of experts estimate suffer mineral imbalance or deficiency, your body is lacking these essential elements, causing your body to misfire so you feel rundown and tired.

Power up with Ionic Sea Mineral Drops. Highly concentrated and containing over 70 ionically charged trace minerals harvested from the world's oldest inland sea, Ionic Sea Mineral Drops is the perfect solution for replenishing your body with the nutrients you need to maintain optimum health.

Because Ionic Sea Minerals are extracted directly from nature, the readily bioavailable minerals in Ionic Sea Mineral Drops are ionically charged and in precisely the same proportion as healthy human fluids without synthetically produced compounds or deadly heavy metals. These minerals have been derived from the weathering and erosion of the huge variety of soils and rocks found in the drainage basin of the Great Salt Lake of Utah.

Ionic Sea Minerals are appropriate to take with normal or sodium restricted diets. It is so concentrated that 40 drops (1/2 tsp) is equivalent to 1/2 cup of sea water with 99% of the sodium removed.

As a daily supplement, take one drop per 6lbs of body weight per day. It is best taken on two separate occasions (i.e. with your breakfast and evening meals).

Ionic Sea Minerals are so essential to

human health that you'll find these minerals in every one of the Albi Naturals Ionic Sea Minerals Product Line. And Ionic Sea Mineral Drops are the perfect way to replenish your body with all the elements you need to plug in and recharge.

The importance of Ionic Sea Minerals

An ionic mineral is an element that has a charge, either positive or negative. On the molecular level, that means the element has either one too many or too few electrons. This unstable ionic state allows the element to bond readily with water, making it possible for the body to absorb it. In this state, an element has specific positive or negative electrical signatures that cause a dynamic equilibrium to take place. The body can then assimilate minor changes to move nutrients to the areas that need them.

Ionic sea minerals are in the Ionic Sea Mineral Drops Formula. Your body requires nearly two thirds of all the elements currently known to man in order to maintain health, keeping these minerals in balance is a complex yet incredibly vital task. The events of everyday demand a continual ingestion of minerals, perhaps that is why an estimated 90% of Americans suffer a mineral deficiency or imbalance.

Unfortunately in today's world, naturally occurring, nutrient-rich foods are becoming a thing of the past. Eons of vegetation growth and aggressive modern farming techniques have brought many of the earth's minerals to the surface where they have been washed away to the oceans.

Chemical and electrical processes are occurring within your body at every moment. Processes that can only function

correctly if the proper balance of minerals is continually being supplied to your system. Iron for your blood, sulfur for your muscles, calcium for your bones, and an aggregation of many other elements in balanced trace amounts to ensure the proper function of your body.

In a few surviving inland seas such as the Great Salt Lake of western North America, these essential elements exist in highly concentrated, salubrious proportions. The fact that the minerals are in a similar proportion as healthy, living matter is a key. And this intricate balance of every mineral and trace element in seawater is why it is so beneficial to the human body.

Albi Naturals has now developed a line that uses this highly concentrated seawater from Great Salt Lake – known as Ionic Sea Minerals. When you've been deficient in your mineral intake, and you take Ionic Sea Minerals, you can soon feel the difference supplementing your diet with the essential nutrients can make.

Increased mineral intake also conditions your body for more ready absorption of the other ingredients in our many formulas. Taking a formula with Ionic Sea Minerals ensures you are getting the most from every supplement you take.
